SSC	Raja Shivaji Vidhyalay	Maharashtra Board	2010	83%

CERTIFICATIONS

Android Development – Certified by Learncodeonline

Diploma in Networking & Security – Certified by I-Tech Institute

Technical Skillset

- Programming Languages   : Java ,Javascript
- Frameworks   : Laravel , IONIC

- Tools   : Saltstack

Projects

- Digital Introduction App :Unity Android
  This project is made using android where whenever we place mobile camera on adhaar card it replaces aadhar card with blurred random image thus ensuring safety of sensitive aadhar UID number, we used Vuforia engine to achieve this task. It extract features point of aadhar card from camera and replaces it. It also tracks aadhar card if moved at any direction without any delay.

- Delivery Plus (Android Application)
  An Ecommerce app implemented in android where user can choose desired product and add it to cart, We implemented geolocation library to track coordinates of user to track from where he is buying and calculate distance between customer and administrator which helps to show route in order to dispatch the product. We also implemented integration for payment gateway.

- Insurance Duniya (IONIC)
  This project is implemented in android, here various insurance from various bank is compared and allow user to choose optimal one. It also consist video tutorial on how to choose insurance wisely. User can filter various insurance by various category and ROI charged by each bank on it. Here data from various bank is collected through web scrapping.
